GEORG ECKERT INSTITUTE FOR INTERNATIONAL TEXTBOOK RESEARCH (GEI)

The Georg Eckert Institute (GEI) conducts applied, multidisciplinary research into textbooks and educational media, informed by a cultural and historical standpoint. The Institute also advises education policy-makers, practitioners and as well as organisations, both on the national and international stage. Furthermore the GEI is involved in the coordination and mediation of international matters involving textbooks and its research infrastructure enables it to promote research into textbooks around the world.

EDU|MERES

The virtual network for
international educational
media research

EDUMERES – THE VIRTUAL NETWORK FOR INTERNATIONAL EDUCATIONAL MEDIA RESEARCH

EDUMERES provides a central access point to the Georg Eckert Institute's research-oriented information and communication infrastructure. Straddling national and disciplinary boundaries the portal brings together a multifaceted range of tools and materials through the access it provides to academic works and research and makes them available to the widely dispersed community of textbook and educational media researchers and practitioners.

INFORMATION AND RESEARCH TOOLS OF EDUMERES

EDU.NEWS features up-to-date information such as announcements of conferences or events relevant to educational media research and practice.

EDU.REVIEWS is a platform featuring reviews of German language textbooks. Through discussions with teachers, pupils, academics and students the platform brings together different perspectives on textbooks, creating a dialogue between theory and practice.

EDU.DOCS is the central access point to freely available publications from the field of international educational media research.

EDU.DATA is an international information platform which provides data on the development and application of textbooks within the context of their respective education systems. The platform gathers information regarding textbooks from around the world and presents it in a user-friendly and research-oriented manner.

EDU.EXPERTS is a new module currently being developed which aims to encourage networking between those involved in international textbook and educational media research.

CURRICULA WORKSTATION & GEI-DZS are being developed in collaboration with the Institute's library.

The **CURRICULA WORKSTATION** provides open access to German and international curricula from the area of social sciences education. The **GEI-DZS** database contains textbooks and atlases approved for German schools for children from year 5 onwards (age 10 and above).
